

AGP-9700 Card Encoding Software

Designed to run on a Windows®—based PC connected to an Amano AGP-5600 mag-stripe ticket reader/validator, this system allows the user to read and create tickets, validation coupons, and Management and Programming cards for use with the Amano AGP series Fee Computer and AGP series pay station based parking systems.

Creates entry tickets, exit tickets, lost tickets, cancelled tickets, service tickets, validation coupons, decrement cards, inventory cards, programming cards, universal management cards and total cards.

The AGP-9700 Card Encoding Software system requires the following:

- AGP-9700/A664 encoding software with software dongle key protection
 - AGP-5610 mag-stripe ticket reader/validator
 - AGP-0509/A558 TC-Converter
 - Miscellaneous connectors and cables
 - Optional AGP-0500 lock vault for AGP-5610
- PC running Windows (95, 98, NT, 2000)
Operating system, equipped with:
- RS-232C port
 - Printer port
 - Mouse/keyboard
 - CD-ROM drive

Specifications are approximate and are subject to change without notice.
